## Grinding Oil Tools

### Stabilizer Grinding

Phoenix Abrasives have over many years supplied the Oil and Petroleum service industry with Grinding Wheels for grinding tungsten carbide Hardfacing.

Our depth of knowledge of the grinding application and actual grinding results in the field have resulted in Phoenix offering a grinding wheel which has become the Benchmark within the service industry. Our grinding wheel is made with premium quality black silicon carbide abrasive grit within a resin bond system and is now regarded as the universally accepted wheel grade for tungsten carbide oil tools.

Because of the many varied types of grinding machines we offer grinding wheels as small as 76.2 x 12.5 x 9.52mm (3" x ½" x ⅜") up to 915 x 101 x 304.8mm (36" x 4" x 12" ) which can be plain wheels or have recesses.

All wheels are manufactured in the U.K. and are designed, manufactured and tested to comply with the European standard E.N.12413 ( safety requirements for bonded abrasive grinding wheels) and are subjected to our quality management system ISO 9001-2000
